Amendments to the Specification

In the Specification please replace the paragraph starting at p. 3, line 24, with the following:

In a preferred LCP, (III) is about 3 to about 10 molar parts and more preferably to about 8 molar parts, and/or (II) is about 90 to about 97 molar parts and more preferably about 93 to about 97 molar parts, and/or (IV) is about 100 to about 200 molar parts, more preferably about 100 to about 175 molar parts, and most preferably about 100 to about 160 molar parts. Also, preferably the molar ratio of (I)/(II)+(III) is about 0.95 to about 1.05 and more preferably about 98 to about 1.02. Any of these preferred compositional ranges may be combined with any of the other preferred compositional ranges.
